

Christmas 2021: Street Lighting panels designed by the Soho Parish Primary School students

Sponsor a Christmas Street light

Soho Christmas street lighting panel project, designed by local primary school students is well underway. The switch on event will take place on the 8th of November at 5pm, and lights will be brightening up the streets of Soho until the beginning of January 2022 - please see press release enclosed.

Annual funding of Soho Parish Primary School was very badly affected by the pandemic, as it lost income from lettings, wraparound childcare and the Soho Food Feast initiative totalling £150,000 in the last academic year.

One of the aims, of the Soho Christmas Street lighting project, is to raise funds for Soho Parish Primary School, and you can help us achieve this by sponsoring a light panel. Your contribution will go towards financing some of the services and projects that the school relies on to provide the best possible education to its students – please see Soho Parish School Fundraising Needs 2021-22 letter enclosed.

In order for you to become a sponsor, we require a minimum contribution of £500, and we will mention your company name and logo in the QR code copy of the light panel you sponsor, as well as any other relevant promo material. Your sponsorship lasts for the period that the light panel is on display, 8th November 2021 till 15th January 2022 (TBC).

Please let me know if you require more information, we hope you can help us secure funding for Soho Parish Primary School to help brighten up students' education in this academic year, whilst having a long-lasting impact on their lives and future careers.
